EXPERIENCE

TECHNOCOLABS SOFTWARES
— *Full Stack Developer*

MAR 2021 - MAY 2021

In this we developed a website basically provides courses to the learners. I have developed the authentication,signup forms for both students and Instructors. Along with these I created students's and Instructor's profile pages. Connected these to the databases

Tech: MongoDb,Reactjs,Nodejs, HTML, CSS,Javascript.

PROJECTS

STICKY NOTES APP
— *Web Application*

This website is kind of sticky notes where you can add description of notes that you want to save at the moment. One can add their thoughts at that moment and can edit it later or delete it

Tech: Node Js, Express Js, Chart Js, HTML , CSS.

Link https://notesbydj.netlify.app/

Your Mart — *Web Application*

This project is an E-commerce website where there are various products you want to buy. User can add the products to cart and checkout the cart.This project helped me to learn and practice Reactjs in depth and learn more about databases and deployment.Deployed the website in netlify.

Tech: React Js,Commerce Js,slick js,material-ui,CSS,HTML.

Link: **https://your-mart-shopping.netlify.app/**

ToDoList — *Web Application*

This website helps us to keep a record of tasks to be done on that particular day. One can delete the task after completing it.One can open this and make their mental space free.Added the voice recognization feature too.

Tech: Node Js,Express Js, MongoDB ,HTML, CSS.
